Dear Mr Suharman,

Thank you for submitting your manuscript to Aquaculture Reports.

I have completed my evaluation of your manuscript. The reviewers recommend reconsideration of your manuscript following major revision. I invite you to resubmit your manuscript after addressing the comments below. Please resubmit your revised manuscript by Aug 30, 2022.

When revising your manuscript, please consider all issues mentioned in the reviewers' comments carefully: please outline every change made in response to their comments and provide suitable rebuttals for any comments not addressed. Please note that your revised submission may need to be re-reviewed.

To submit your revised manuscript, please log in as an author at <https://www.editorialmanager.com/aqrep/>, and navigate to the "Submissions Needing Revision" folder.

Aquaculture Reports values your contribution and I look forward to receiving your revised manuscript.

Kind regards,
Peng Lei, Ph.D

Editor and Reviewer comments:

Reviewer #1: Title:
Title can still be shortened.
What do you mean exactly by "on-growing"?

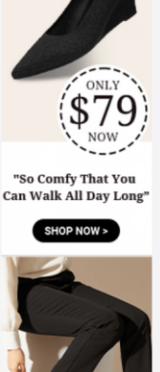

Abstract:
The abstract is appropriate.

Keywords:
The keywords used are appropriate.

Introduction:
This section is appropriate.
The third paragraph should be separated into two paragraphs. From the sentence "Salt preservation is considered a practical and..." to the end should start as the next paragraph.

Materials and Methods:
This section is complete and comprehensive.

Results:
Include P values in all the data presented (part 3.1).

Discussion:
Delete sentence 1 and 2 of the first paragraph. No need for this.
Discussion is appropriate.

Tables:
Table 2:
Proximate composition should be expressed as mean +/- standard deviation.

Table 3:
EAA should be expressed as mean +/- standard deviation.

Table 6:
AA should be expressed as mean +/- standard deviation.

Reviewer #2: The manuscript entitled "The role of intestine on efficient utilization of dietary starch in carnivorous swamp eel *Monopterus albus*" summarized the function of intestine on the efficient utilization of dietary starch in swamp eel. Generally, the manuscript is well written. This paper has several weaknesses and needs improvement before publication. This manuscript has major language problems. There are too many for me to modify them all. Authors are strongly encouraged to seek a native English speaker who may assist you modifying the document.

Reviewer #2: The manuscript entitled "The role of intestine on efficient utilization of dietary starch in carnivorous swamp eel *Monopterus albus*" summarized the function of intestine on the efficient utilization of dietary starch in swamp eel. Generally, the manuscript is well written. This paper has several weaknesses and needs improvement before publication. This manuscript has major language problems. There are too many for me to modify them all. Authors are strongly encouraged to seek a native English speaker who may assist you modifying the document.

Comments:

1. Why did the authors choose this technology instead of other GWAS? Please provide the reason.
2. How much RNA was used in PCR? Was it one-step or 2-step PCR?
3. Summarize the abstract, focus on the main findings and mention the small conclusion in at the end of abstract
4. In the Introduction focus on the objectives and insert a few new reference and relevant findings
5. In material and method sections, references are missing.
6. Most of the references mentioned are old and I suggest adding recent references, and the manuscript should be edited accordingly.
7. I suggest the cite following paper in introduction part For more information you can read below reference
Raza, S. H. A., Abdelnour, S. A., Alotaibi, M. A., AlGabbani, Q., Najei, M. A., Shokrollahi, B., ... & Zan, L. (2022). MicroRNAs mediated environmental stress responses and toxicity signs in teleost fish species. *Aquaculture*, 546, 737310.
8. Material and method needs to clarifying and summarizing- some detailed needs
9. The subtitles in the material and method needs to summarizing Ethical approval and references must be mentioned in M&M
10. In the result section, the results were written very poorly. It should be written again and try to avoid a brief introduction in the starting of every result.

In conclusion, the research presented is interesting, well planned and carried out. The manuscript can still be improve revise by a native English speaker. Nevertheless, I believe that this work deserves publication in after the inclusion of corrections.

From:
Date: 10/08/2022 02:33 AM
 Dear Dr. Peng Lei,

Thank you for sending us the timely review of our manuscript, "Growth, feed utilization, and carcass quality of on-growing river catfish *Hemibagrus nemurus* fed with salted by-catch and fish viscera meal mixtures as fishmeal substitute" (Manuscript Number AQREP-D-22-00651). The manuscript was reviewed by 2 reviewers. We are now in the process of revising the manuscript as we are given until Aug 30, 2022 to re-submit the revised version including the point-for-point response to the reviewers' comments. Unfortunately, we noticed that there was an error in the review report of Reviewer #2. The review that was submitted is for the manuscript with the title "The role of intestine on efficient utilization of dietary starch in carnivorous swamp eel *Monopterus albus*". We cannot address the comments and suggestions of Reviewer#2 because of this error. We would appreciate if you could send us the review report of the Reviewer #2 so we could revise accordingly and meet the Aug 30 deadline.

We are hoping for your favorable action on this request.

Thank you very much.

Best regards,

Decision on submission to Aquaculture Reports

Aquaculture Reports <em@editorialmanager.com> To: Indra Suharman Thu, 22 Sept 2022 at 07:01

Manuscript Number: AQREP-D-22-00651R3

Growth and carcass quality of on-growing river catfish *Hemibagrus nemurus* fed with dietary salted by-catch and fish viscera meal mixtures as fishmeal substitute

Dear Mr Suharman,

Thank you for submitting your manuscript to Aquaculture Reports.

I am pleased to inform you that your manuscript has been accepted for publication.

My comments, and any reviewer comments, are below. Your accepted manuscript will now be transferred to our production department. We will create a proof which you will be asked to check, and you will also be asked to complete a number of online forms required for publication. If we need additional information from you during the production process, we will contact you directly.

We appreciate you submitting your manuscript to Aquaculture Reports and hope you will consider us again for future submissions.

We encourage authors of original research papers to share the research objects – including raw data, methods, protocols, software, hardware and other outputs – associated with their paper. More information on how our open access Research Elements journals can help you do this is
